

## ABSTRACT OF THE DISCLOSURE

An apparatus and a method for a user to create a poster having one or more of images is disclosed. The method includes the steps of (a) prompting the user to select a template corresponding to a type of poster; (b) prompting the user to select one of a plurality of image sources; (c) receiving one or more images from the selected one of the plurality of image sources; (d) prompting the user to select one or more of the one or more received images; (e) repeating steps (b) through (d) until a desired number of images is selected; (f) placing the selected images on the template; and (g) outputting a signal representative of the poster.
